Before and After

How does the squirrel survive in the city?
my animal habitat

What I Think		What I Found Out
Getting Food and Water	I think a squirrel eats nuts from trees and drinks water from puddles.	
Shelter	I think a squirrel lives in a hole in a tree.	
Movement	I think squirrels run fast and climb trees.	
Fighting	I think squirrels have sharp claws and teeth to defend themselves.	
Hiding	I think squirrels can run away, climb trees, and hide in holes.	
Staying warm or cool	I think squirrels have warm fur, but I never see them in the winter.
